February 10, 2006

I had constant right shoulder pain for over four months. It was mild pain most of the time with occasional episodes of severe pain. More recently I started to have tingling and later pain into my right arm down as far as my hand. The problem seemed to be getting worse and nothing seemed to help.

I was referred to Jones Chiropractic by a friend. I am thankful that I took that referral.

I had been to a chiropractor back in the 1940's for sports related injuries but had not considered seeing one now. Dr. Jones did a through examination which included orthopedic tests, x-rays and a computerized spinal screening. He wrote down all my aches and pains. In addition to the shoulder, I had had neck pain for years and both my knees hurt longer than that.

After completion of the examination, he gave me a Report of Findings and outlined a treatment plan for me to follow.

Dr Jones adjusted my spine, my shoulders, elbow, and hands, and my feet, knees, and hips. After the first week my neck pain was gone and my other aches and pains were significantly better. After a month of treatment I cannot believe how much better I feel. I do not hurt constantly. I cannot believe how Dr Jones has helped my knees. They don't hurt constantly and I can bend them further than I have in years. I feel better all over.

I RECOMMEND DOCTOR JONES to everyone one I know. He has helped me so much.

Thank-you Dr Jones,

Bill R.
