

TESTIMONIAL

On 27 April 2005, I woke up with severe stabbing pain in my low back. I could not even stand up straight. It hurt to move. In addition, I had had tingling in my left arm and hand for about three weeks.

Dr. Jones gave me a thorough exam and began treatment. The pain was reduced by one-half in less than a week. Additionally, I was able to stand pretty straight without severe pain and was able to resume some normal activities.

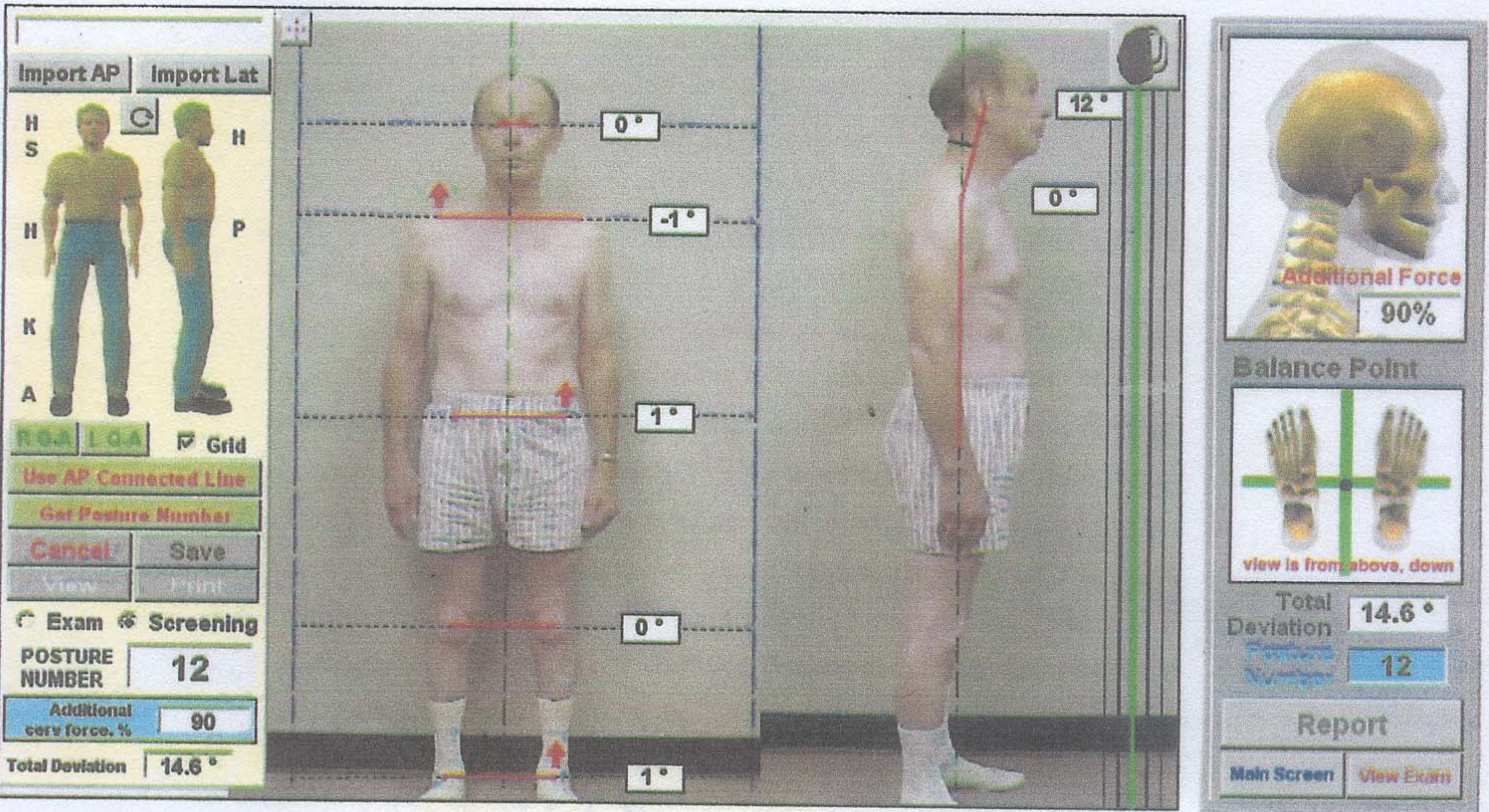

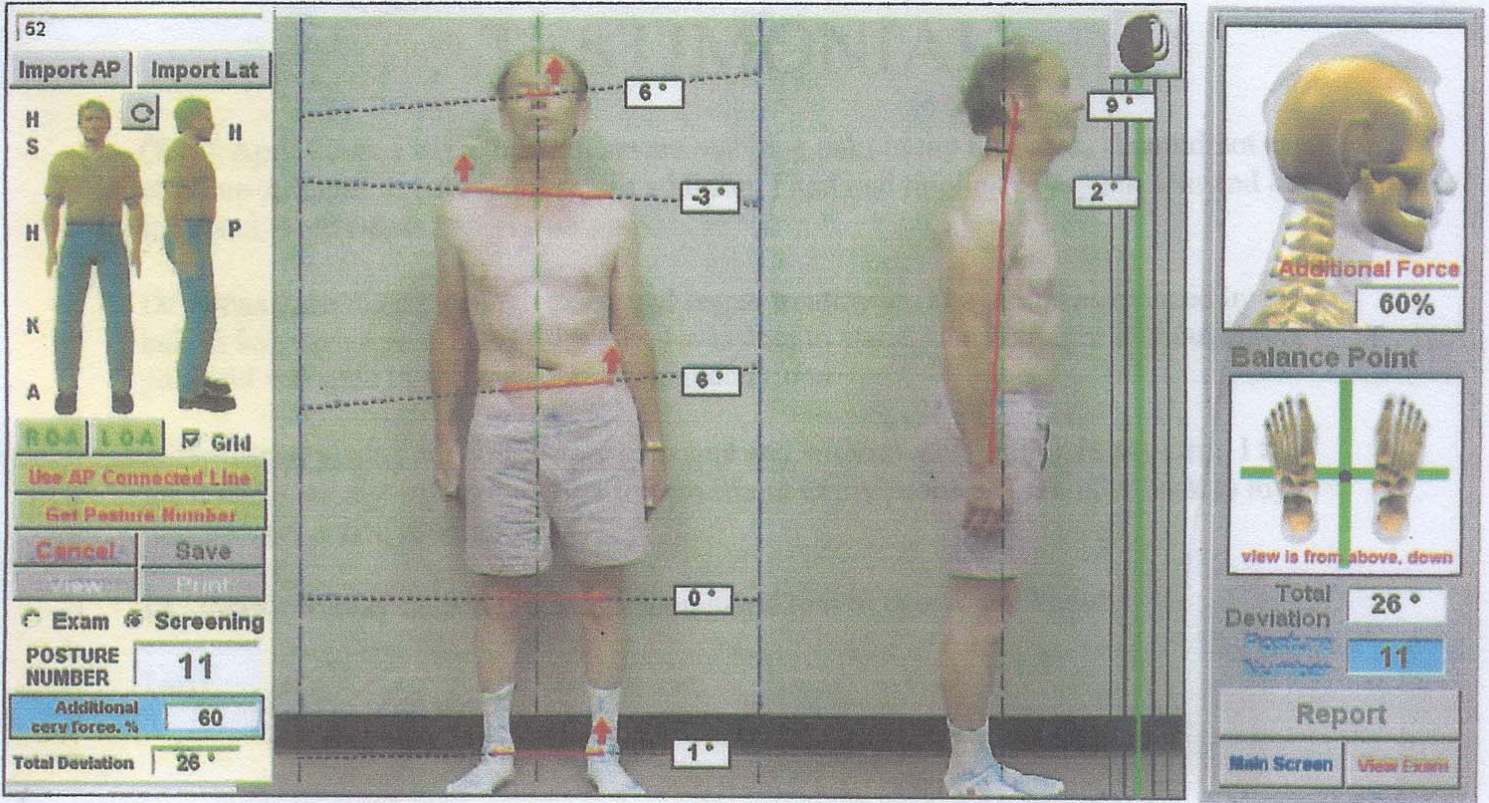

After fifteen visits I am completely pain free and without any tingling in my arm. I feel great and even my wife notices the improvement in my posture. I am now back to my normal very active routine.

Dr. Jones certainly helped me and I recommend him to everyone I know.
