A friend of a friend referred me to Dr Jones. I am thankful that I took that referral.

I had been suffering from sinus problems for at least six years. I also have many allergies – crab, scrimp, dogs, cats dust, feathers, trees, and grasses just to mention a few which may effect my sinuses. No one could really tell me what was causing this chronic sinus condition. I was in year round pain.

Over the years I have been on many kinds of medicines to clear up my sinus problems. Some worked better than others but the infection, or whatever it is, always came back after the medication ran out.

In fact, I have even had surgery to clear the blockage. I had several x-rays showing blockage in my left maxillary sinus before the surgery and a clear sinus after surgery. The follow-up x-rays showed blockage again.

In short, I have been everywhere and tried everything. Nothing worked!

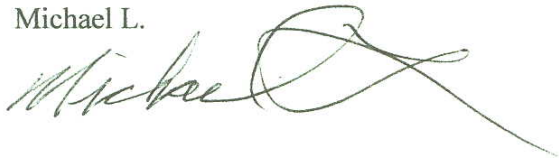

Then I saw Dr Jones. He gave me a thorough physical, a computerized spinal analysis, read my x-rays, and explained what he could do. From the first treatment I felt much better. The pain was gone. After a few visits the constant sniffles were gone.

After years of pain and seemingly endless doctor visits my sinus problems are resolved. Dr Jones has made a positive and significant change to my life. I have repeatedly told him how grateful I am to him. I now see “my chiropractor” regularly so I do not have reoccurrence of my sinus problems.

Dr Jones is a great doctor and I recommend him to everyone I know.

Sincerely,

Michael L.
