

TESTIMONIAL

I met Doctor Jones during the Lewis & Clarke Days in July 2004. He told me he thought I had a really bad headache. I did!! After talking to him for a few minutes I picked up one of his office fliers and enjoyed the rest of the celebration.

Two days later I was in his office for a physical and adjustment. I was having nagging low to middle grade back pain in my neck and right shoulder of about five months duration accompanied by frequent moderate to severe headaches. This condition seemed to be getting worse as time went on. In addition, I had developed a low grade low back pain about one week earlier. The neck and shoulder pain was effecting my sleep and my job.

Within the first week my headaches had stopped and my other symptoms had been significantly reduced. After one month of treatment, not only was the pain gone but, the swelling in my ankles was gone. I was able to breathe more deeply, And I was able to walk on uneven surfaces without stumbling as much. In fact I mowed my whole lawn without stopping. I had not felt this good in years!

Doctor Jones certainly made my life easier. I would refer anyone to him.

Sincerely,

James A.
