

Testimonial

While in the army, years ago, I fell off a deuce and a half truck landing on the back of my head and right shoulder. In addition I had a sack of gear over that shoulder. Since then I have suffered from dizziness and neck and shoulder pain.

I was dizzy almost all the time. The pain was bad enough ranging from moderate to severe pain, however, the dizziness was so bad at times I was often totally disabled. I just could not do anything. In fact, I was hospitalized twice for the dizziness. The VA labeled me disabled but with no disability pay.

Over the years, I have had all kinds of tests run on me and have repeatedly been told there is nothing that they can find wrong. I have even been told I have Meniere's Disease — but I have never been diagnosed with it. Since they cannot find what is causing my dizziness and pain, I have been prescribed several types of medication to control my dizziness and pain. These remedies have not relieved my symptoms, and the side effects of some of these medications are as bad as the dizziness.

I met Doctor Jones at Riverfest. I had never been to a Chiropractor before but after talking to him I made an appointment to see him. He did a complete chiropractic physical on me, which included a complete medical history, vitals signs, cranial nerves checks, cervical and lumbar range of motions checks, orthopedic tests, Posture Pro computerized posture checks, and palpation.

I have not had any periods of dizziness since the first adjustment. I had moments of dizziness the first day or two but these occurrence became less intensive and further apart. By the third visit I had stopped using the dizziness medications all together. The pain has gone from severe to very mild. You cannot believe how good it is to not be dizzy and to not be in severe pain.

Doctor Jones has changed my life entirely! I recommend him to everyone.

Thank-you

Carolyn J.
